

Experience the **PINK** difference.

World Class Pest and Pool Management

Pink South Pacific has a strong focus on the support of indigenous Solomon Islanders being trained to Australian Standards. Since 2007 we have been consulting on a range of specialist services including Termite & Pest Management as well as Swimming Pool & Water Tank Maintenance.

Pink South Pacific is fully insured and in 2019 became a locally incorporated company in Honiara after years of specialist consulting. A copy of our Honiara Business licence is available upon request.

World class Termite and Pest Management to Australian Standards.

Pink South Pacific Pty Limited was established to offer Premium Services within Honiara and throughout the Solomon Islands. We have a strong focus on developing indigenous Solomon Islanders to ensure they are trained to the relevant Australian standards and industry best practices in order to deliver premium services to our valued customers throughout the South Pacific. Pink South Pacific Pty Limited is proudly supported by Pink Australia.

MOSQUITO MANAGEMENT PROGRAMS: Pink South Pacific Pty Limited provides the highest level of service to Honiara and the Solomon Islands for mosquito management. We are fully trained and backed by the Pink Australian team who train and manage the local Solomon Island personnel to ensure the very best in Vector Management is achieved.

TERMITES: Termite activity is widespread and significant damage has occurred throughout Honiara. The economic cost is significant with repairs bills running into the tens of thousands of dollars. We can provide safe, effective and environmentally responsible solutions to remove current infestations and offer protection against future infestations.

BED BUGS: Bed bugs have recently become an increasing problem in Honiara. Successful bed bug treatments require highly specialised training and the Pink team are the most qualified with training to ensure every bedbug treatment is done in accordance with the Australian Code of Practice. We offer discrete, effective treatments for bed bugs with minimal impact on day to day operations.

HACCP COMPLIANT INTEGRATED PEST MANAGEMENT: Pest Management in the Food Industry is particularly important and a Code of Practice to cover these specialised needs was recently developed as a joint project between Australia & New Zealand.

We can tailor a business-specific pest management program to suit individual food industry businesses. These programs are designed to target rats, mice, cockroaches, stored product pests or other food industry-related issues. Our tailored programs can be designed to comply with any existing Quality Assurance or HACCP system.

Commercial maintenance

Specialist Disinfection Services.

Including Covid 19.

HOME & BUSINESS DISINFECTION: The Coronavirus is quickly changing the world around us, your family and staff will need the very best protection you can give them.

Our specialist COVID-19 disinfection was developed for the airline industry and will help safeguard your home and business against COVID-19 and other viruses and bacteria. Our disinfection agent is non-toxic and won't harm people or pets. It destroys viruses, fungi and bacteria and is eco-friendly – naturally degrades in the environment, allowing premises to be re-entered within a short period of time.

Premium pool servicing.

Including equipment and supply.

Specially trained pool technicians to Australian Standards.

SALTWATER CONVERSION: Our professional team can convert your existing chlorine pool to salt water, this will greatly reduce the cost of chemicals and provide a much nicer swimming experience.

Swimming pool hardware supply and installation is also available, including pumps and filters that are sourced directly from Australia and include full manufactures warranty.

POOL MAINTENANCE: We provide pool management services to the Australian standards and utilise premium chemicals sourced directly from Australia. We can ensure your pool is maintained and looked after year-round to ensure a perfect swimming experience every time.

Pink South Pacific Hygiene Services.

Our range of hygiene services and products provide a premium service offering within Honiara and throughout the Solomon Islands. We have a strong focus on developing indigenous Solomon Islanders to ensure they are trained to the relevant Australian standards and industry best practices in order to deliver premium services to our valued customers. Pink South Pacific Pty Limited is proudly supported by Pink Australia.

FEMALE SANITARY BINS

Our female sanitary bins use a combination of a liner and specialist bio granules to provide a safe environment for the containment and disposal of sanitary waste. Our professional sanitary service allows for easy and hygienic disposal of feminine sanitary waste products in a safe and clean environment.

AUTOMATIC SOAP DISPENSERS WITH ANTIBACTERIAL HAND SOAP

Our soap dispensers comply with infection control protocols using high quality antibacterial hand soap. Manual soap dispensers do not comply with infection control measures as they require physical contact.

URINAL ENZYME INSERTS

Our urinal enzyme inserts assist in the sanitising of men's urinals. They clean and deodorize the urinal to provide a better user environment and cleaner bathrooms.

AUTOMATIC AIR FRESHENER UNITS FOR USE IN TOILETS, WASHROOMS

Our automatic air freshener units are made for use in the washroom environment and deliver fragrances that give a great first impression. We also provide a full maintenance and refill service, so your air fresheners are always in service.

Our staff are trained in Australia by our experienced Hygiene professionals to ensure our customers receive the very best in service.
